**SHREE DHARMASTHALA MANJUNATHESHWARA LAW COLLEGE CENTRE FOR POST GRADUATE STUDIES
AND RESEARCH IN LAW**

**ONE DAY STATE LEVEL WORKSHOP ON RESEARCH METHODOLOGY IN SOCIAL SCIENCES:
"UNDERSTANDING BASIC RESEARCH CONCEPTS: SCIENCE, SOCIAL SCIENCE AND SCIENTIFIC
KNOWLEDGE"**

**PROF. (DR). V SUDESH, PROFESSOR IN LAW AND CHAIRPERSON IN THE UNIVERSITY LAW COLLEGE
AND DEPARTMENT OF STUDIES IN LAW, BANGALORE UNIVERSITY**

ON 24TH OF JUNE, 2023

The session on "UNDERSTANDING BASIC RESEARCH CONCEPTS: SCIENCE, SOCIAL SCIENCE AND SCIENTIFIC KNOWLEDGE" was started by Prof (Dr) V Sudesh by asking all the students of Masters in Law to orient themselves, and stated that by questioning why they chose to join post graduation in law is how they could orient themselves.

He later on explained "What is Research" by stating it is "an activity which adds to the existing field of knowledge". He stated that there has to be a scientific or an orderly approach in carrying out research and it should be "an organized body of knowledge in a particular discipline(s)". He emphasized that time, quantity, quality and having a perfect measurement of all the samples for data collection is very important, similar to that of pure science research on subjects like Physics, Chemistry, Biology etc. and while he stated that in social sciences based research philosophy can alter the way a researcher approaches the research topic, objectivity should be tried to be realized.

He then stated that the purpose of research is to contribute to scientific knowledge and that in every era everyone will come up with various theories, and that research helps in the building of knowledge and said theories by testing the hypotheses. It should be the "equilibrium of many truths" and one should have an open mind while carrying out a research.

He further went on to explain that concepts are the units of research like individuals, groups, organizations, countries etc. For a first time or a regular researcher he asked all the students to take one such unit and do an analysis. He strongly warned against generalization of research and repetition of the results of research as it serves no purpose and such research has no meaning and will be rejected by the University Grants Commission of India.

At the end he talked about variables, construct and concepts in research and stated that concepts like Safety, freedom, right, equality etc. must be developed and explained through research. He explained

that constructs add on to a concept and gave the example of Health as a concept with Weight as its corresponding construct and likewise Equality as a concept and Opportunities as its construct. For variables he gave an example of students and teachers being variables in the concept of education.
