C|FA™
CYBER FORENSICS ASSOCIATE

The Cyber Forensics Associate(C|FA) certification demonstrates an individual's knowledge on how to detect hacking attacks and properly extract evidences to report the crime and conduct audits to prevent future attacks. Individuals who learn the principles of digital forensics can become invaluable members of incident handling and incident response teams.

The purpose of the Cyber Forensics Associate credential is to validate the candidate's skills to identify an intruder's footprints and to properly gather the necessary evidence to prosecute in the court of law.

Benefits of earning an EC-Council Certifications

- Advancement towards a career field with ultimate growth potential and learning opportunities.
- Validate knowledge and problem-solving skills for a career in cyber forensics.
- Legitimize their hacking skills and knowledge to help defend organizations' networks.
- Position them as credible job candidate to employers.

CYBER FORENSICS ASSOCIATE EXAM OBJECTIVES

1 Analysis

- **1.1** Analyze forensic images
- **1.2** Apply procedural concepts required to use forensic tools
- **1.3** Apply basic malware analysis using NIST accepted forensic techniques and tools
- **1.4** Identify anti-forensics techniques
- **1.5** Determine the important content of event logs in forensics

2 Discovery

- **2.1** Apply procedural concepts necessary to detect a hidden message inside a picture
- **2.2** Analyze a conversation between two endpoints from a PCAP file
- **2.3** Recognize that devices are kept in the same state as they were found
- **2.4** Determine how to gather evidence in a forensically sound manner
- **2.5** Apply procedural concepts required to discover evidence on different file systems
- **2.6** Apply procedural concepts required to gather evidence on different operating systems
- **2.7** Identify proper steps in network capture
- **2.8** Given a scenario, determine evidence of email crimes

3 Evidence

- **3.1** Determine and report logon/logoff times for a specific user
- **3.2** Verify the authenticity of evidence (e.g., hash value)
- **3.3** Summarize the proper handling of evidence
