CENTRE FOR POST GRADUATE STUDIES & RESEARCH IN LAW
MANGALURU - 575003

AFFILIATED TO KARNATAKA STATE LAW UNIVERSITY, HUBBALLI
RECOGNIZED BY BAR COUNCIL OF INDIA, NEW DELHI
(NAAC Accredited B⁺⁺ CGPA 2.9)

Sponsored By: Sri Dharmasthala Manjunatheshwara Educational Society®, Ujire, D.K.

Metric No: 7.1.6: Quality Audits on Environment and Energy are regularly undertaken by the institution

Green Audit/ Energy Audit/ Environmental Audit Report (Inclusive Report)

Academic Year 2022-2023

Audit Report is prepared by Dr K.R Chandrashekar

Dr. K R Chandrashekar,
Professor & Scientist,
Head, Yenepoya Pharmacy and Ayush Research Centre
Advisor – IQAC,
Former Professor & Chairman, Department of Applied Botany, Mangalore University

Deralakatte
Karnataka
575018, DK

Dated, 24th Nov. 2024

This is to certify that, I, Dr K R Chandrashekar, as the Chairman of the Audit Committee constituted by the Principal, Sri Dharmasthala Manjunatheshwara Law College have conducted the Environmental Audit and Green Audit in the said college campus along with the team members of the committee and submitted the report.

1. Introduction

SDM Law College, Centre for Post Graduate Studies and Research in Law, Mangaluru 575003 was established in the year 1974 as the brainchild of Padma Vibhushan Dr D Veerendra Heggade, offering 5 years BA.LLB, BBA.LLB and 3 years LLB courses affiliated to Karnataka State Law University, Hubballi and Recognized by the Bar Council of India. Centrally located in the heart of this coastal city, the campus ensures compliance of environmental sensitivity through various green initiatives. To confirm the same, a green audit report has been prepared and authenticated by an external auditor.

Vision Statement of the College

"To impart holistic knowledge of law and mould students to be competent legal professionals, committed to the cause of community development through sustained academic activities and research thereby promoting empowerment through legal education for building ethical society".

Mission Statement of the College

- Learner centred education of excellence
- Strong community interaction
- Professionalism in education and service
- Efficiency, quality, continuous improvement and innovation in all the processes of our system
- Develop adaptability skills to meet the challenges of changing times

The student and faculty strength of the college is listed below:

Title	Male	Female	Total
No. of Students	353	682	1035
No. of Teachers	12	14	26
No. of Non- Teaching Staffs	15	08	23

Physical Infrastructure

The built-up area of the college is 4066 Sq.Mts

Departments	2
Conference Halls	1
Library	1
Auditorium	1
Canteen	1
Moot Court Hall	1
Classrooms	15

2. Objectives of Green Audit

The objective of the Green Audit is to assess the environmental quality and the management strategies being implemented in.

The specific objectives are:

1. To document the greenery of the campus
2. To monitor the energy consumption pattern of the college
3. To evaluate the waste management system
4. To impart environment management plans to the college
5. To provide a database for corrective actions and future plans.
6. To assess whether extracurricular activities of the institution support the collection, recovery, reuse, and recycling of solid wastes.
7. To identify the gap areas and suggest recommendations to improve the Green Campus status of the college.

3. Target Areas of Green Auditing

Green audit forms part of a resource management process. Although they are individual events, the real value of green audit is the fact that they are carried out, at defined intervals, and their results can illustrate improvement or change over time. Eco-campus concept mainly focuses on the efficient use of energy and water, minimize waste generation or pollution and economic efficiency.

All these indicators are assessed in the process of "Green Auditing of this educational institute". Eco- campus focuses on the reduction of contribution to emissions, procure a cost effective and secure supply of energy, encourage and enhance energy use conservation, promote personal action, reduce the institute's energy and water consumption, reduce wastes to landfill, and integrate environmental considerations into all contracts and services considered to have significant environmental impacts. Target areas included in this green auditing are green campus, energy, waste, and carbon footprint.

Auditing for Green Campus Management

Trees play an important ecological role within the urban environment, as well as support improved public health and provide aesthetic benefits to cities. In one year, a single mature tree will absorb up to 48 pounds of carbon dioxide from the atmosphere and release it as oxygen. The amount of oxygen released by the trees of the campus is good for the people in the campus. So, while you are busy studying and working on earning those good grades, all the trees in campus are also working hard to make the air cleaner for you.

Auditing for Water Management

Water is a natural resource; all living organisms depend on water. While freely available in many natural environments, in human settlements potable (drinkable) water is less readily available. Groundwater depletion and water contamination are taking place at an alarming rate. Hence, it is essential to examine the quality and usage of water in the college. Water auditing is conducted for the evaluation of facilities of raw water intake and determining the facilities for water treatment and reuse.

Auditing for Energy Management

Energy conservation is an important aspect of campus sustainability which is also linked with carbon footprint of the campus. Energy auditing deals with the conservation and methods to reduce its consumption related to environmental degradation. It is therefore essential that any environmentally responsible institution examine its energy use practices.

Auditing for Waste Management

Human activities create waste, and it is the way these wastes are handled, stored, collected and disposed of, which can pose risks to the environment and to public health. Pollution from waste is aesthetically displeasing and results in large amounts of litter in our communities which can cause health problems. Solid waste can be divided into three categories: bio-degradable, non-biodegradable and hazardous waste. Bio-degradable wastes include food wastes, canteen waste, wastes from toilets etc. Non-biodegradable wastes include what is usually thrown away such as plastics, tins and glass bottles etc. Hazardous waste is waste that is likely to be a threat to health or the environment like cleaning chemicals, acids, and petrol. Unscientific management of these wastes such as dumping in pits or burning them may cause harmful discharge of contaminants into soil and water supplies and produce greenhouse gases contributing to global climate change respectively. Special attention should be given to the handling and management of hazardous waste generated in the college. Bio-degradable waste can be effectively utilized for energy generation purposes through anaerobic digestion or can be converted to fertilizer by composting technology. Non-biodegradable waste can be utilized through recycling and reuse. Thus, the minimization of solid waste is essential to a sustainable college. The auditor diagnoses the prevailing waste disposal policies and suggests the best way to combat the problems.

Auditing for Carbon Footprint

Burning of fossil fuels (such as petrol) has an impact on the environment through the emission of greenhouse gases into the atmosphere. The most common greenhouse gases are carbon dioxide, water vapour, methane, nitrous oxide, and ozone. Of all the greenhouse gases, carbon dioxide is the most prominent greenhouse gas, comprising

402 ppm of the Earth's atmosphere. The release of carbon dioxide gas into the Earth's atmosphere through human activities is commonly known as carbon emissions. Vehicular emission is the main source of carbon emission in the campus, hence, to assess the method of transportation that is practice in the college is important.

4. Methodology Adopted

The methodology adopted to conduct the Green Audit of the Institution had the following components.

Onsite Visit

Two days visit was conducted by the Green Audit Team. The key focus of the visit was on assessing the status of the green cover of the Institution, their waste management practices and energy conservation strategies etc.

08	Ficus elastic Roxb. ex Hornen	Moraceae
09	Ixora coccinea L.	Rubiaceae
10	Ocimumtenuiflorum L.	Lamiaceae
11	Lawsoniainermis L.	Lythraceae
12	Plumeria rubra L.	Apocynaceae
13	Catharanthus roseus (L.) G.Don	Apocynaceae
14	Lantana camara L.	Verbenaceae
15	Centella asiatica	Apiaceae

Routine Green Practices

Every year college celebrates World Environment Day in the campus. The focus of these programmes was to provide awareness to the students about the importance of the environment, its conservation and sustainable use of environmental resources. The programs are conducted through guest lectures, poster competitions etc.

A fishpond is also being maintained in the campus with aquatic plants and fishes.

Energy Audit Report

Energy Audit Report

The below table shows the energy consumption pattern of the college for a month. The college has consumed an average of 2544 kW/hr electricity in a month and the one-year electricity bill amount was Rs. 5,59,224/- (which includes electricity consumption of other two Institutes under the same management)

Sl. No	Electrical Appliances/ Instruments	No.	Power / (W)/unit	Total Power (W)	kW	Operation/day	kW/hr	No. of days in month	Total Consumption per month
1.	Tube	90	38	3420	3.42	4	13.68	25	342
2.	LED Bulb	110	9	990	0.99	4	3.96	25	99
3.	Projector	13	280	3640	3.64	1	3.64	25	91
4.	Speakers	21	10	210	0.21	1	0.21	25	5.25
5.	Fan	110	60	6600	6.6	4	26.4	20	528
6.	Computer	26	250	6500	6.5	4	26	20	520
7.	Printers	05	60	300	0.3	1	0.3	20	6
8.	Photostat Machine	02	650	1300	1.3	2	2.6	20	52

Waste Management

Waste management is important for an ecofriendly campus. In college different types of wastes are generated, its collection and management are very challenging. The following data provide the details of the waste generated and the disposal method adopted by the college.

Total Classrooms	14
Canteen	1
Office	1
Auditorium	1
Library	1

Different types of waste generated in the college and their disposal.

Types of Waste	Particulars	Disposal Method
E-waste	Computers, electrical and electronic parts	Direct selling
Plastic waste	Pen, refill, plastic water bottles and other plastic containers, wrappers etc.	Direct selling
Solid wastes	Damaged furniture	Resue after maintenance
Waste water	Washing, urinals, bathrooms	Soak pits
Organic waste	All kind of biodegradable waste	Decomposing unit

07	Carbon free campus	Partially Exist
08	Plastic free campus	Partially Exist

Green Landscaping

Sl.No.	Practice	Status
01	Overall Green Cover	Partial

6. Suggestions and Recommendations

- **Green Campus:** In order to increase the carbon credit and greener of the campus, it is recommended to plant more indigenous and evergreen/ fruit trees inside the campus.
- **Energy Management:** The energy audit recommends avoiding the use of more energy consuming electrical appliances and to replace with more environment friendly and energy efficient appliances (for example five star rated air conditioner) in the college. The potential of renewable energy sources must be explored. As the college has a very large roof area for installing solar panels so that it can be effectively used for generating power.
- **Water Management:** The water sources are safe in terms of contamination. The students are taking back the food waste as per the zero-waste management strategy of the college. It helped in reducing the consumption of water for washing.
- **Waste Management**
 1. Try to avoid the use of plastics in the campus, and to encourage the use of biodegradable materials as alternatives. Try to achieve the goal of plastic free campus.
 2. The canteen waste can also be subjected to aerobic composting by setting-up of few composting yards in the campus. This will provide a chance for the students to learn by seeing and operating such compost yards by themselves. Also, a good practice of managing their own waste (from lunch box) instead of carrying them back home, they can be trained in operating the compost yard, by using their lunch time waste to produce good organic manure.
